Executive Summary

Version 1.0

This document lists all of the graphics that have been used in the high-fidelity user interaction demonstration (documented in Quick Capture Platform Storyboards). If the graphic used in the demonstration was made up of more than one graphic element, the composite graphic and the components have been included.

There are six attributes listed for each graphic:

1. **In Use Area** - indicate where on the user interface the image is used
2. **Name** - the name of the image
3. **Image** - the image itself
4. **Dimensions** - the dimensions (if fixed) in millimeters. Note that there are some images without dimensions as their sizes are fluid, i.e. can be expanded or reduced as needed
5. **Description** - a brief description of the image and its use
6. **File Name** - the file name of the image as it's stored/referenced by the program
