

PSCR 2020: THE DIGITAL EXPERIENCE

NIST

#PSCR2020

What We Learned by Participating in a PSCR Challenge

Hear from two past judges and two innovators share, from their perspective, about what they learned about innovating for public safety through their participation in the Haptic Interfaces for Public Safety Challenge.

DISCLAIMER

Certain commercial entities, equipment, or materials may be identified in this document in order to describe an experimental procedure or concept adequately.

Such identification is not intended to imply recommendation or endorsement by the National Institute of Standards and Technology, nor is it intended to imply that the entities, materials, or equipment are necessarily the best available for the purpose.

*** Please note, unless mentioned in reference to a NIST Publication, all information and data presented is preliminary/in-progress and subject to change**

Haptic Interfaces for Public Safety Challenge

Panel

Ryan Fields-Spack
Director, Public Safety Strategy and Policy
FirstNet, Built with AT&T
Judge

Captain Todd Heintz
Emergency Medical Services Captain
West Metro Fire District (Colorado)
Judge

Felix Desourdy
Haply Robotics
Contestant

Sean Hackett
Carnegie Mellon University
Contestant

Sarah Hughes
Prize Challenge Specialist
NIST PSCR

Contestants' Perspectives

What was your most rewarding experience participating as a contestant for the Haptic Interfaces for Public Safety Challenge?

Contestants' Perspectives

What key takeaways did you learn about prototyping for public safety communication technology?

Judges' Perspectives

Please tell us about your experience as a judge for Haptic Interfaces for Public Safety Challenge.

Judges' Perspectives

What stood out based on your experience interacting with the contestants and technology innovators?

Judges' Perspectives

What advice do you have for any current or future innovators about participating in PSCR's challenges?

Questions from the Public Safety Perspective

**What compelled you to enter the challenge
to explore and design haptic interfaces
for first responders?**

**What preliminary research did you do
to begin your prototyping process?**

What advice would you have for innovators about connecting to public safety?

Key Lessons Learned & Advice for Innovators

Live Questions & Answers.

THANK YOU
