

2020 PUBLIC SAFETY BROADBAND STAKEHOLDER MEETING

NIST

#PSCR2020

Steps you can take when partnering with public safety agencies to develop and test technologies

How do successful public private partnerships support the development and testing of innovative communication technologies?

What are some examples of successful partnerships from the perspectives of public safety leaders?

This discussion will focus on a series of questions with the goal of encouraging others who are just starting or planning for future partnerships.

DISCLAIMER

Certain commercial entities, equipment, or materials may be identified in this document in order to describe an experimental procedure or concept adequately.

Such identification is not intended to imply recommendation or endorsement by the National Institute of Standards and Technology, nor is it intended to imply that the entities, materials, or equipment are necessarily the best available for the purpose.

*** Please note, unless mentioned in reference to a NIST Publication, all information and data presented is preliminary/in-progress and subject to change**

Agenda

**PULLING
THE FUTURE
FORWARD**

Introduction

Welcome, Overview, and Introduction

Panel Discussion

An in-depth discussion with a panel of experts who helped create unique partnerships, develop new technologies, and deploy those technologies.

How are public safety partnerships important every step of the way?

Discovery

Early stage innovation

Testing & Validation

Technology is tested and retested in a variety of situations

Development

Application of an innovation to a use case

Commercialization

Commercial off the shelf technology is mission ready

Panel Discussion

An in-depth discussion with a panel of experts who create unique partnerships, develop new technologies, and deploy those technologies.

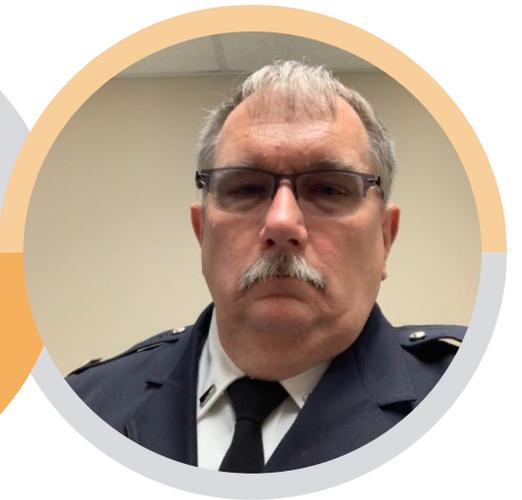

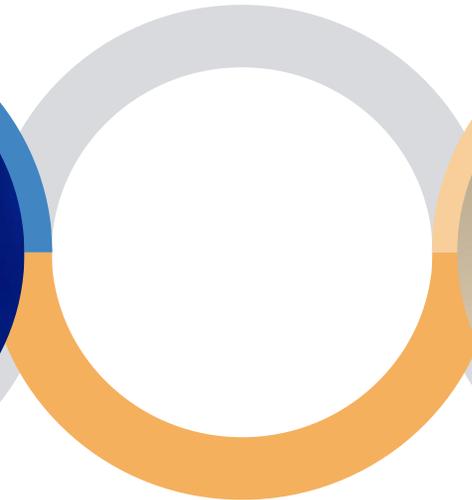

Panel Discussion

● **Craig Connelly**
Public Safety Communications
Research Division, NIST

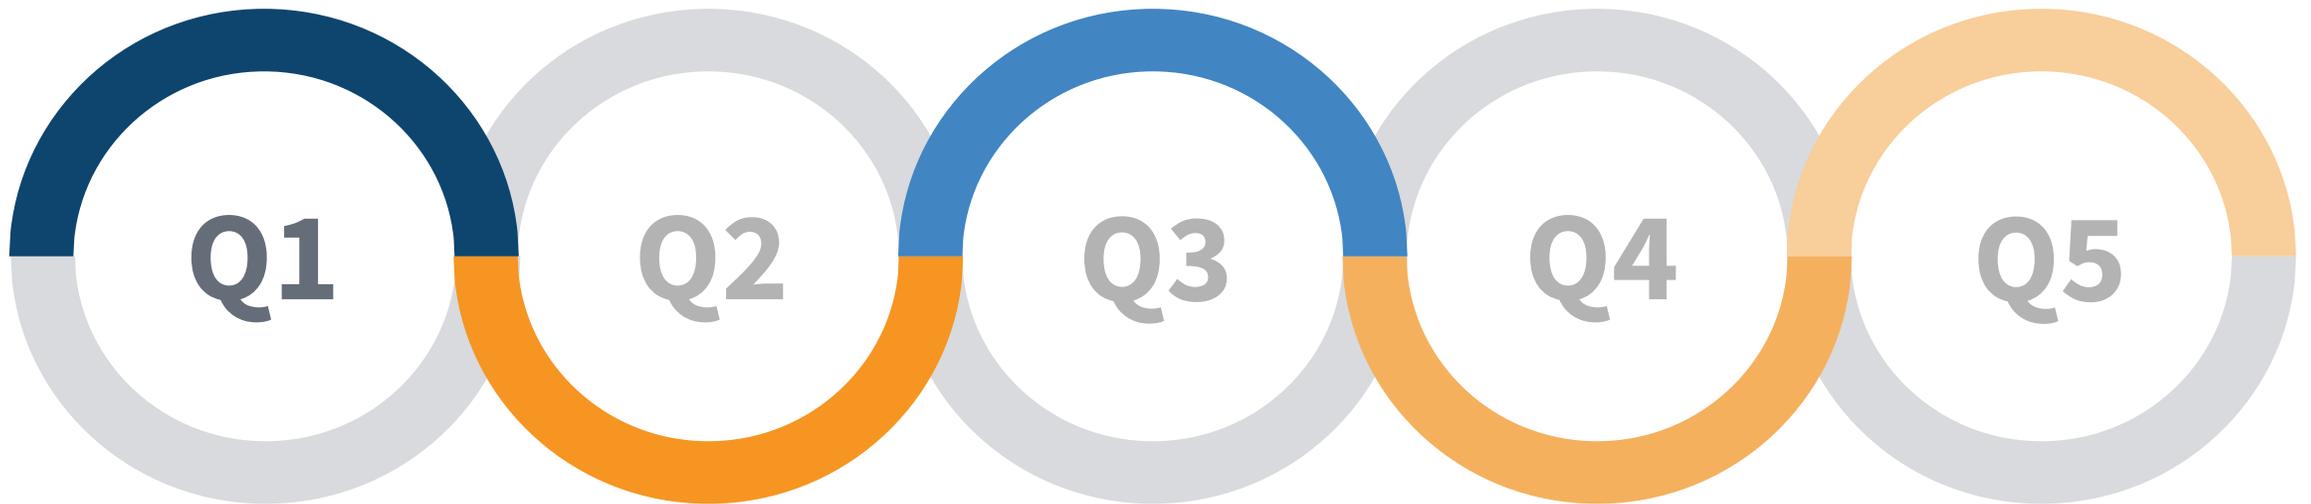

● **Jonathan Lewin**
Senior Public Safety Advisor
First Responder Network
Authority

● **Charlie Fair**
Paramedic
Manger EMS IT - Retired

Questions for the panel

● Can you give a brief overview of your experience as a public safety leader?

● How do successful public private partnerships work?

● In reaching out to public safety - what are the first steps they should take?

● How are partnerships structured?

● Can you give us an example of a successful partnership?

Questions for the panel

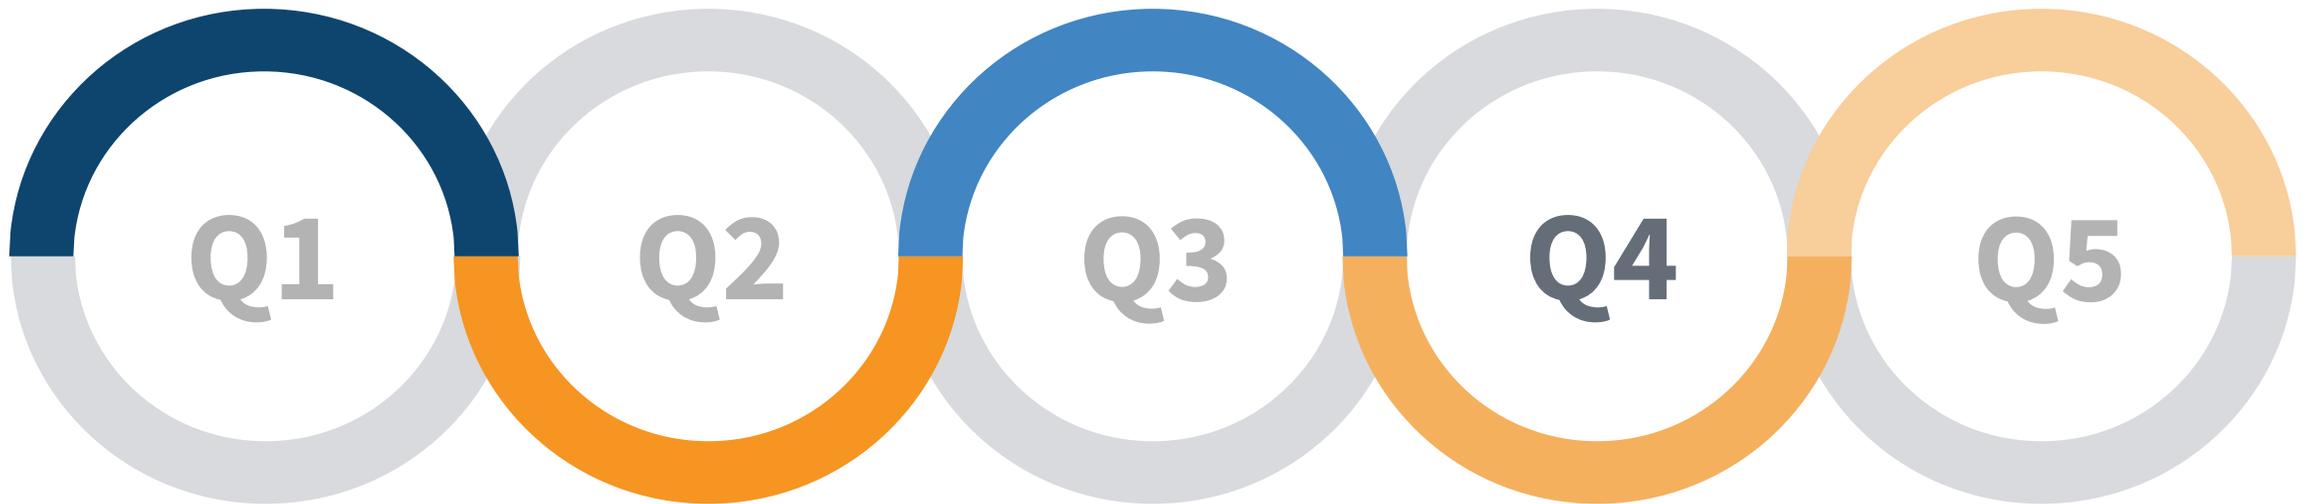

- Can you give a brief overview of your experience as a public safety leader?
- How do successful public private partnerships work?
- In reaching out to public safety - what are the first steps they should take?
- How are partnerships structured?
- Can you give us an example of a successful partnership?
