

U. S. DEPARTMENT OF COMMERCE

National Bureau of Standards Certificate

FOR

STANDARD TEMPERATURE SAMPLE 43d

ZINC

MELTING POINT OR FREEZING POINT

419.5₂° C.

The melting point given above is that of the sample issued under this certificate, and is not to be taken as the melting point of the absolutely pure metal.

Full details of the precautions that should be observed in freezing-point determinations are given in National Bureau of Standards Circular

on Standard Samples for Thermometric Fixed Points. This circular can be procured free of charge by applying to the National Bureau of Standards, Washington, D. C.

NOTE.—Further information is given in National Bureau of Standards Research Paper RP 768. This paper may be purchased from the Superintendent of Documents, Washington, D. C., at 5 cents per copy.

Lyman J. Briggs,
Director.
