

## 106.3 - Mercury in Activated Carbon

These SRMs are intended for use in the evaluation of chemical methods of analysis for mercury.

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

<b>SRM</b>	<b>Description</b>	<b>Unit of Issue</b>	<b>Mercury (mg/kg)</b>
<a href="#">2445</a>	Mercury in Iodized Activated Carbon	25 g	0.690
<a href="#">2448</a>	Mercury in Brominated Activated Carbon	25 g	0.723
<a href="#">2451</a>	Fine Carbon (Activated) - From Cyanide Ore Leaching	100 g	688
